

Solar Interconnection Process for Residential Projects (residential)

The following items must be satisfactorily approved and complete before REMC can interconnect.

- **Interconnection Application (form)**
 - Provides basic information about the project ownership and size and vendor
 - Requires a processing fee of \$100 dollars doe residential class units

- **Duplicate of NCUC compliance filing – Report of Proposed Construction**
 - Contains major components of the project and other information

- **Technical Design**, including all components and compliance details of each.
 - A one-line diagram of the design is required here.

- **Proof of Insurance**
 - General Liability coverage minimum of \$100,000 per occurrence for residential class

- **Interconnection Agreement**

- **County Inspection**
 - Must be verified prior to scheduling Commissioning test

- **Commissioning Test and Meter Replacement**

Duplicates of the above documentation is shared among departments when the project is ready for commissioning and meter replacement.
