

2019 Annual Report

DEAR MEMBERS,

As this message is written, we are experiencing a global pandemic that has changed all of our lives over the past few months, impacting individuals and businesses in our community alike. For 82 years, your cooperative has responded to the worst of storms to serve our members and this is no different. We are here for you and your families and we'll get through this together.

Along with providing safe and reliable power, we empower you to use energy wisely, ensure that you get exceptional value for the money you spend, and strive to make our communities better places to live and work.

In these uncertain times, it's good to know your cooperative was already seasoned at providing the convenience, choice and control to manage your bill, as well as how you use electricity. From high energy use alerts and instant payments from the mobile app, to special rates for electric vehicle charging and providing access to renewable energy, we're here for members at their homes and businesses and in our communities.

Over the past year, Randolph EMC has focused on helping you manage your energy in the ways that are most convenient for your lifestyle. Through our surveys we know that members of all ages are utilizing smart devices and expect their co-op to be digitally engaged, as well.

Randolph EMC has increased electronic messaging through text and email to keep members informed about outages, contractor working locations and billing updates.

We've also leveraged advancements in technology to offer you a choice in how you're billed and more timely, relevant access to your energy consumption information.

The REMC Mobile App and Online Member Service Portal on our website provides you full access to your account. In addition to managing profile information and payment methods, our suite of online services includes convenient ways to pay and receive bills, billing and usage alerts, energy use monitoring, access to our real-time outage map and more.

Another area that continues to gain interest is electric vehicle adoption. Randolph EMC has been a pioneer in supporting this technology and bringing infrastructure to our rural area. We're excited about the far-reaching impacts EVs could have on our industry and we're proud to be a forward-thinking electric utility well on our way to meeting the high demand electric vehicles will have on the grid.

We invite you to learn more about what's in store for the future of your cooperative at REMC's Virtual Annual Meeting, which will be broadcast on our Facebook page on Friday, October 9, at 10 a.m. We will certainly miss seeing all of our members in person, but hope you'll join us to celebrate the strength of our cooperative, conduct important business of our association and focus on how we can continue our mission of providing affordable and reliable electricity to our member-owners.

Cooperatively yours,

Jerry Bowman, Board President Dale F. Lambert, Chief Executive Officer

Dale 7. Vambert

DRIVE ELECTRIC

Plug-in electric vehicle drivers, supporters, & intrigued visitors of the N.C. Zoo attended an event hosted by Randolph EMC as a kick-off to the annual National Drive Electric Week in September. Plug-in vehicles by Chevrolet, Ford, Nissan, & Tesla, along with EV chargers were on display for event attendees. Local manufacturer Thomas Built Buses also had their all-electric school bus "Jouley" available for tours.

I was recently diagnosed with lung cancer and was surprised when I received a check from People Helping People to help with my medical treatments. I learned that a neighbor had referred me for assistance and am overwhelmed at the generosity shown by my fellow REMC members. Thank you to the People Helping People program for your love and support during this difficult period in my life.

99

\$12,000

Bright Ideas Education Grants

2019 marked the 25th anniversary of the Bright Ideas program, which provides funding for projects in all grade levels and subject areas. Since 1994, North Carolina's 26 electric cooperatives have collectively awarded more than \$12.2 million for nearly 11,700 projects benefiting 2.3 million students.

BOLIVIA

In the Spring of 2019, 13 lineworkers from seven N.C. electric cooperatives, including two from REMC, joined forces to bring first-time electricity and new opportunities - to a remote village in Bolivia, South America, thanks to the Brighter World Initiative. The Brighter World Initiative was coordinated through NRECA International, a national cooperative philanthropic group that has brought electricity to more than 160 million people in 44 developing countries since 1962.

Dennis Kidd and Tim Williamson received the President's Volunteer Service Award for their contributions.
